

Testimonial -

When I started TMS treatment I was so ill that I could not stay out of bed for more than a couple of hours. I was not eating and not able to care for my own personal needs. I was also not able to care for the needs of my household and family. I struggled to communicate how very ill I was and ~~so~~ ^{was} fearful ~~to~~ ^{to} ~~forget~~ that I would never be well enough to meet the needs of my demanding career again. I was truly without hope.

Now that I have finished my TMS treatment I have resumed my usual daily activities and will return to my former full time position without restriction. I am happy and hopeful about my future. I am clearly thinking and feeling stronger emotionally than I have for more years than I can remember. I will be forever thankful to Dr Dutton and his staff for the kind, compassionate and skillful treatment I received during the most difficult passage of my life.
