

TRANSCRANIAL MAGNETIC STIMULATION

rTMS is a non-invasive, non-systemic treatment that utilizes MRI strength magnetic pulses to stimulate areas of the brain known to be underactive in depression.

NeuroStar TMS Device

About Southern California TMS Center

FOUNDED in 2009 by Todd Hutton, MD. Locations throughout Southern California.

PHILOSOPHY: Best Treatment. Highest Standards.

At Southern California TMS Center, providing the best treatment possible in a caring and compassionate environment is our #1 goal. We maintain the highest standard of care and provide the latest and most advanced Transcranial Magnetic Stimulation treatment available.

EXPERIENCE: Southern California TMS Center is one of the largest TMS providers in the United States. SoCal TMS has administered over 40,000 treatments since 2009.

SOLID COORDINATION OF CARE SoCal TMS has a proven track record of working successfully with referring physicians and third party payers.

MEDICAL EXPERTISE: Dr. Todd Hutton was one of the first psychiatrists to acquire a NeuroStar TMS device. He is a clinical psychiatrist with an inpatient and outpatient practice, and is an Associate Clinical Professor at USC Keck School of Medicine.

MANAGEMENT: With a solid team in place, SoCal TMS manages multiple locations with a streamlined operational set up. Scheduling, Billing, Patient Relations are handled seamlessly across locations.

QUALITY: Southern California TMS Center preserves the highest level of quality and integrity for patient care. We currently use solely the Neuronetics Neurostar system due to its superior results, history of safety, and patient comfort and acceptance.

OUR TMS TREATMENT & PROTOCOLS

STANDARDS

- ❑ Southern California TMS Center has administered over **55,000 treatments**.
- ❑ Maintain established TMS protocols, clinical standards, and quality assurance.
- ❑ **High response and remission rates.**
- ❑ High rates of treatment compliance. No seizures in over 40,000 treatments.

PROCEDURES

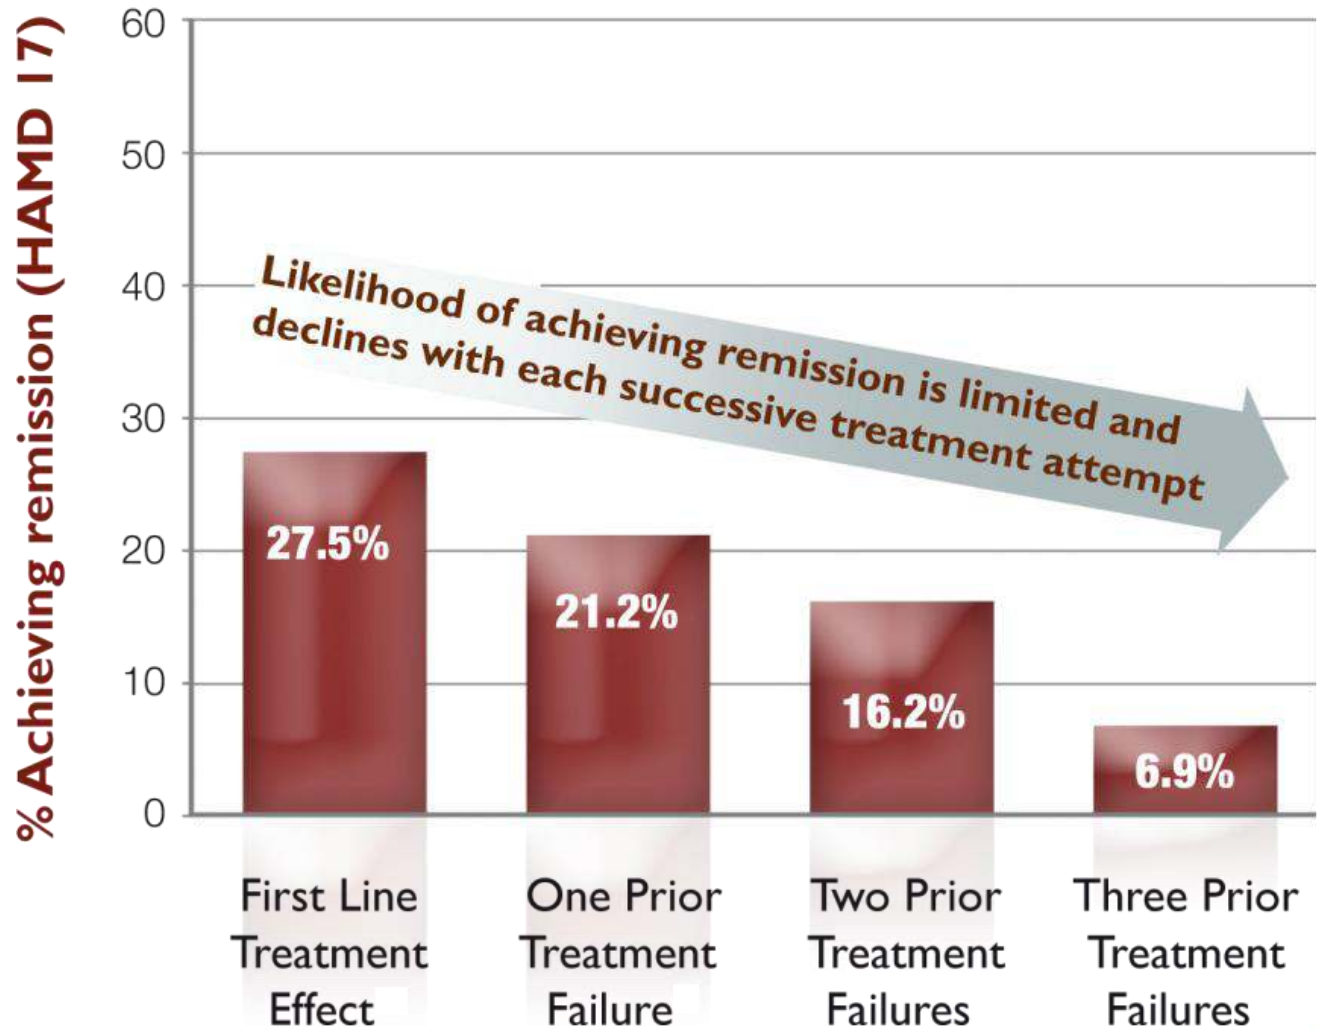

- ❑ Treatment performed by **highly trained** and **experienced** technologists.
- ❑ Treatment prescribed and supervised by psychiatrists with *extensive* experience in TMS
- ❑ Patients are tested weekly with PHQ-9 and QIDS
- ❑ Patient depression scores and graphs distributed to referring physician on regular basis

DEVICES

- ❑ We use only NeuroStar TMS systems, the industry leader in TMS devices
- ❑ NeuroStar Trackstar™ software records all aspects of each treatment for subsequent review
- ❑ All systems are cloud networked, allowing treatment at any of our locations for patient convenience
